

# EXTRA CRAFTY

## Life Size Me

To make a life sized person, you will need a large piece of paper (like leftover wrapping paper) or you might tape several pieces of news paper together until you have a page large enough to trace your whole body on.

Begin by having someone trace an outline of you on your very large piece of paper. Then you can add details.

**EASY:** If you want to keep it easy, make a portrait of yourself. Add eyes, ears, etc. and draw clothes.

**HARD:** If you want more of a challenge, pretend it is an autopsy. Consider drawing major organs, a skeleton, or muscle groups!
