

EXTRA CRAFTY

Cardboard Tube Drum

What you need:

- Strong cardboard tubes in all sizes (paper towel, foil, etc.)
- Duct tape, clear packing tape or balloons
- Scissors

What you do:

1. Cut the tubes with the same diameter in different lengths
2. Tape one end shut with several pieces of duct tape and go once around to secure it. Or, cut a balloon in half and cover the tube ends with the stretched balloon half, and tape in place with duct tape.
3. Tap them with your fingers; it should make a nice sound. If not, you need to tighten the tape or balloon a little more.
4. With a friend, take turns marching or dancing while one of you plays the drums.
