

CRAFTY CHALLENGE

Mushroom Fairy House

Every fairy needs a unique place to live and this craft lets you design your own simple fairy house.

Materials Needed:

large paper plate; scissors; markers, crayons, or colored pencils (optional); washable school glue; stapler (optional, but preferred); printed attached templates

Instructions:

1. Cut off a small section of the paper plate at the bottom to give your house a flat base
2. Print out the roof template (on cardstock, if available) and cut it out
3. Staple it (or glue it if you don't have a stapler) to the top of the paper plate
4. Decorate the rest of the house with the optional decorations on the template or create decorations of your own design

Your fairy now has a complete house!
