

# PAPER CRAFT

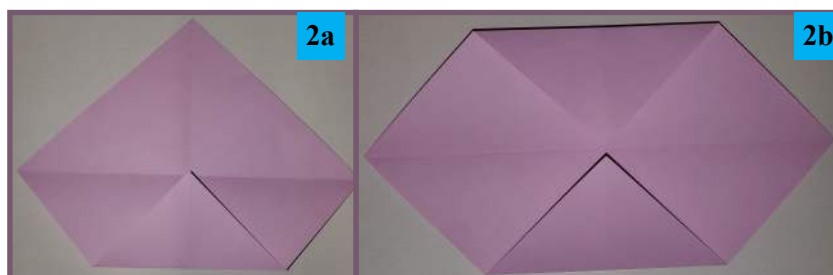

## Origami Creature Eye

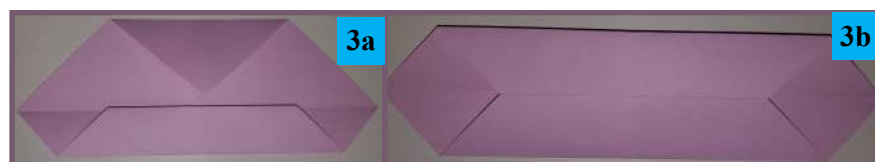

**CREATE THIS EASY AND FUN ORIGAMI CREATURE EYE!**

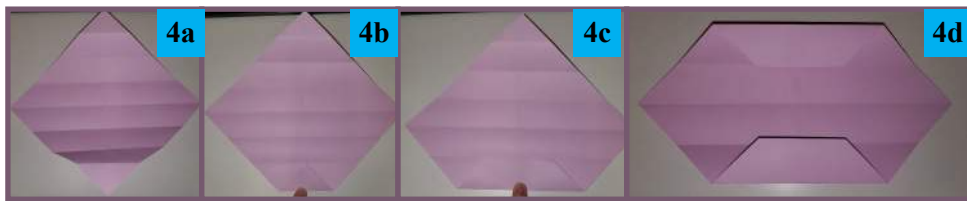

1. Start with a square piece of paper and fold it across from one corner to the other. Unfold the paper and repeat the fold going the opposite direction. Unfold the paper.

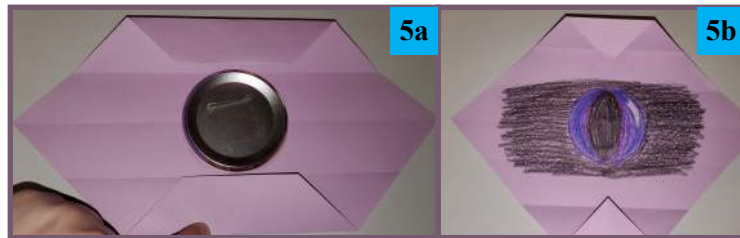

2. Turn the paper so it looks like a diamond. Fold the bottom point up until it meets the midpoint (where the two previous folds cross). Repeat the fold with the top point.

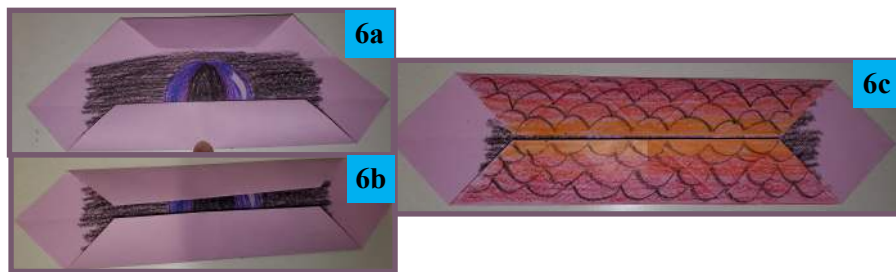

3. Fold the bottom edge up until it meets the center fold. Repeat the fold with the top edge.

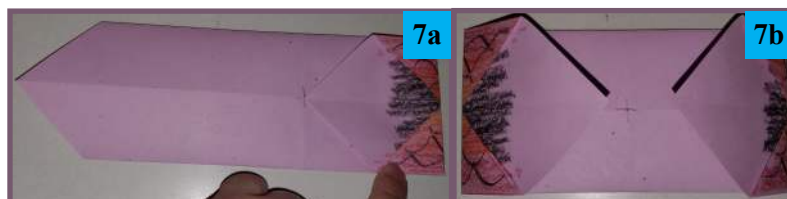

4. Completely unfold the paper. Fold the bottom tip along the existing crease to the next crease. Next, fold the bottom edge up along the existing crease to the next crease. Repeat these folds with the top.

5. Trace or draw a circle in the open middle space. This will be the pupil and iris. Color it however you please.

6. Fold the bottom edge along the existing crease up to the middle crease. Repeat the fold with the top edge. This will be the eyelids. Color them however you please.

7. Flip the paper over. Fold each point in to the middle. It will meet at the point where two previous folds cross.

8. From the midpoint at the top, fold the corner down as seen in the picture. Do this for the top two corners. Unfold them and repeat the process for the bottom two corners.

9. Pinch the corners together, hold up the eye, and gently push forward to make the eye blink.
