

# PAPER CRAFT

## Scratch Magic Paper

You will need:

cardstock or posterboard, glue, highlighters or markers, clear contact paper or packing tape, black acrylic paint & paintbrush, liquid hand soap or dish soap, wooden stick with point or popsicle stick

1. This craft will work with a single piece of paper, but cardstock or posterboard is better.

2. Using highlighters or markers, color the paper in patches, so that there is no white paper showing.

3. Cover the entire paper with either clear contact paper or packing tape, so that all of the coloring is covered with plastic.

4. Mix a small amount of liquid soap with black acrylic paint. Paint over the top of the plastic covered colored paper, and wait until it dries (it may take a while to dry depending on amount of paint used).

5. Using the wooden stick, scratch away the black paint in different shapes, sayings, or drawings, to reveal a magic, multicolored design!
