

Weather Pop-Ups

You will find a basic pop-up template a weather shape template attached.

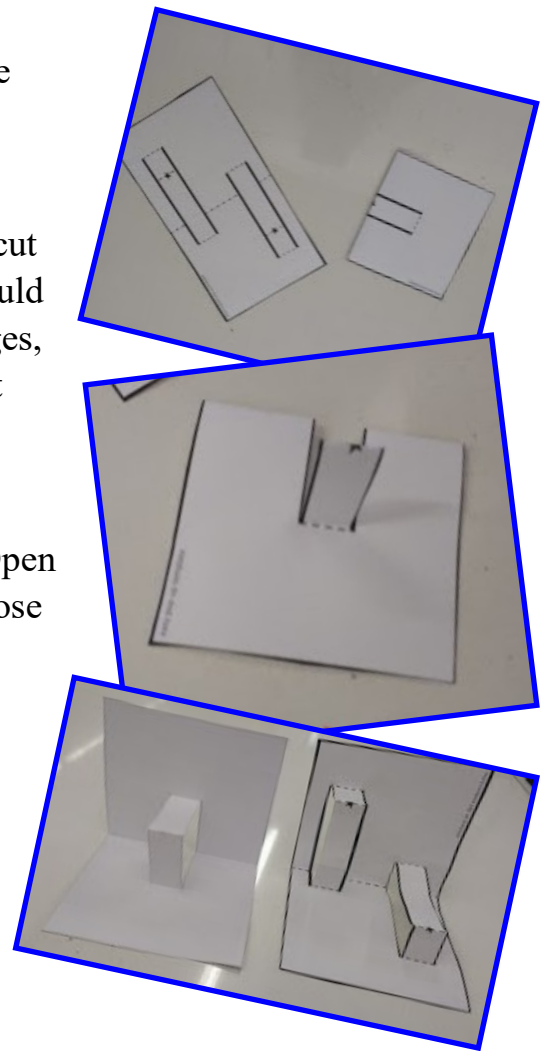

Cut out the pop-up page template, fold on the dotted line, and cut along the thick lines. Decide how many weather pages you would like to make and trace the pop-up page on that many blank pages, including the cut lines. Cut them out, fold them in half, and cut along the cut lines.

Fold the newly created tab back and forth so it moves easily. Open each page and push the tab into the center of the page. Then close the page so the tab remains inside. Glue the backs of the pages together to make a book.

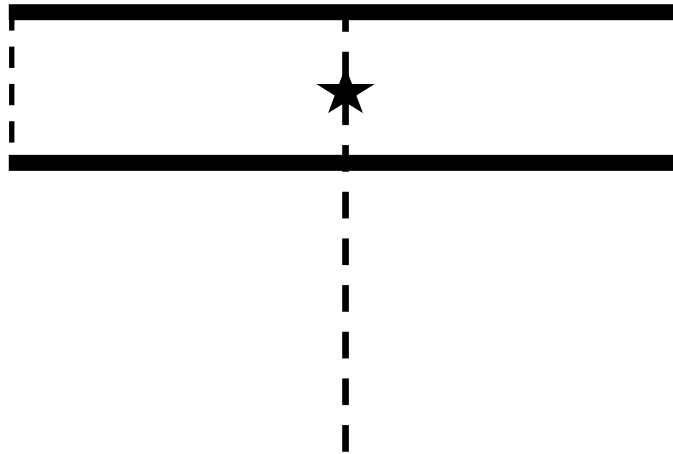

Cut out the weather shape templates and color them or cut out weather details from pictures in newspapers or magazines.

Open one page of your book. Glue a weather shape onto the front of the tab. Decorate the background to suit the weather.

Enjoy your pop-up weather book!
