

Favorite Weather Poll

You might know what kind of weather is your favorite, but how does that compare to your friends and relatives opinions?

Ask everyone you know about their favorite kind of weather and record their answers on the attached chart.

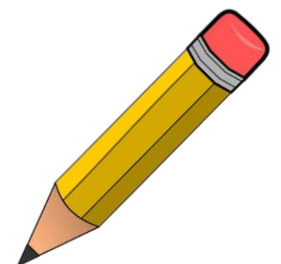

TAKE IT FURTHER:

Scientists sometimes like to find out if two things are related. Consider asking two questions (like favorite weather and current mood or age). Write in the answer to the second question in the spot you colored on the weather graph.

When you are done, look at your answers.

- Do you notice any patterns?
- Who likes sunny weather the most?
- Was there any weather that no one liked?
