

HANDS ON

Shadow Show

Even on stormy days, you can still play with light by setting up a shadow theater.

Using a flashlight or lamp, aim the light at a blank wall and turn off all other lights. Objects placed between the light and the wall will create a shadow!

FUN IDEAS:

- Take turns trying to make characters from a story or animals from the zoo using your fingers in front of the light.
- Cut out animal shapes from paper and hold them in front of the light. Tell a story with the animals!
- Play a guessing game by holding an everyday object in front of the light. Can your friend guess what it is from the shadow? Don't forget to take turns!
