

## SELF-EXPRESSION:

# Special Message Mirror Writing

Want to send a special message, like a compliment you don't want anyone but your spy friends to read? Try mirror writing. First try writing the entire alphabet. Then write your entire message from right to left, with the letters backwards. Hold up to a mirror to see the message.

**Yon are the sweetest**

Want to make it harder to crack? Add *nulls*, meaningless characters in a message to confuse the reader. To see the message without the nulls, simply scratch them out. Then hold up to the mirror to see the final message. Can you read backwards without a mirror?

**Yonaz arize thez sweetzest**
