

## **SEARCH AND FIND:**

# Sherlock “Homes”

**Want to play a “Homes”-inspired clue game where you create and place the clues yourself?**

**With a pack of sticky notes, lay a trail of clues through your house. Then hand someone the first clue and see if they can figure out where the secret location is! (ex: “Find a cold place without any ice” leads to the fridge. Then a note in the fridge might say “I see you. You see you too” and lead to the mirror and so on... )**

**When you have finished designing your game, you can have your family and friends search and see if they can find the secret location!**

**BONUS: if you find or make a deerstalker hat and a magnifying glass...the hunt is on!**
