HANDS ON *World Lantern Pattern*

Decorate your space with the world with this poke paper lantern cover.

You will need a dark piece of paper, a sharp pencil, a towel, and the world map that is attached.

Fold the towel into a square.

Lay the dark paper on the towel and place the map on top of the towel. You may want to tape the pages together at the edges so the map doesn't shift.

Using the sharp pencil, carefully poke holes along the outlines of the continents through the papers.

Once you've followed all the outlines, remove the map and wrap the dark paper around a lamp shade.

When you turn on the lamp, the continents will shine through!
